BANKFINANCIAL CORPORATION
NON-GAAP FINANCIAL MEASURES

BankFinancial Corporation, a Maryland corporation (“the Company”) utilizes a number of different financial measures, both GAAP and non-GAAP, in making operating, budgeting and planning decisions for future periods. Generally, a non-GAAP financial measure is a numerical measure of a company’s performance, financial position or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles in the United States, or GAAP. The Company believes that the use of the non-GAAP financial measures described below provides the Board of Directors and management, and may provide some investors, with a more complete understanding of the Company’s operating results and trends, and facilitate comparisons to historical and peer performance. The Company’s non-GAAP financial measures should be considered supplemental in nature and should not be considered in isolation, or as superior to or a substitute for, financial measures that are prepared in accordance with GAAP. In addition, the Company’s non-GAAP financial measures may differ from similar non-GAAP financial measures that are used by other companies, thus limiting their usefulness as a comparative tool.

These measures include pre-tax pre-provision earnings from adjusted operations and pre-tax pre-provision earnings from adjusted operations to average total assets. Management believes that by excluding equity-based compensation expense, other real estate owned related income and expense items and nonperforming asset management expenses from noninterest expense, these measures better reflect our adjusted operating performance.
